## Chemtran USA<sup>SM</sup>

### "The Dangerous Goods Specialists!"

**Chemtran USA<sup>SM</sup>** was established in 1993 and consists of a team of Dangerous Goods Specialists. Our goal is to provide the highest quality products and services to ensure your hazmat shipments reach their final destination safely, economically and within compliance.

Our **UN** Approved Cartons and Kits have been developed **for Hazmat Shippers, by Hazmat Shippers**. Each product offered for sale is used daily by our Turnkey Logistics Team and Sample Fulfillment Department to ship chemical samples around the world. The difference will be seen and felt in the thickness of our fiberboard and the design of our products.

### A packing solution for every application!

Not sure about the best packing solution for your application? Everyone employed at Chemtran USA is Trained and Certified as a Hazmat Shipper. From operations to sales, our staff is trained and experienced to provide answers or guidance for your difficult shipping situations.

### Knowledge and experience makes the difference!

We appreciate the opportunity to earn your business, and we look forward to showing you the difference Chemtran USA's knowledge and experience can make for your company.

## Chemtran USA<sup>SM</sup> OFFERS HAZMAT EMPLOYEE TRAINING

Compliance is about more than just the correct packaging. The Department of Transportation requires hazmat employees to be trained and certified every 2-3 years.

**Every 2 years:  
IATA – Air**

**Every 3 years:  
CFR49 - Ground  
IMDG - Ocean**

Hazmat employees from entry level to seasoned veteran appreciate the full range of training that we bring to the classroom.

All students who successfully complete our One-Day training class will have skill and knowledge for verifying, inspecting and completing

hazardous material packaging/shipping papers as their job functions require.

Chemtran Instructors discuss customer-specific issues in the classroom, and **tailor the presentation** to the specific needs and challenges that you and your coworkers deal with on a daily basis.

### TRAINING AVAILABLE:

- **Chemtran USA Classroom**
- **On-site at your Facility**
- **Computer-Based Training**

## GLOBAL LOGISTICS

### OUTLYING ORIGIN TRANSPORT

**Chemtran USA<sup>SM</sup> ships your non-bulk Dangerous Goods within compliance: TO any global destination, FROM any global destination.**

Our experienced and certified team collects your shipping data, and then handles the “heavy lifting” by forwarding everything

you need as a Hazmat Shipper. The entire service is tailored to your shipment/specific requirements, and can be utilized for

all modes of transportation allowed by the regulations: Air, Ground, or Ocean.

Your shipment will be monitored from our location to the shipper and from the shipper to the final destination. In addition, full customer support will be available throughout the entire process.

- ◆ Fully Assembled UN Approved Combination Packaging
  - Pre-labeled with Shipping Information
  - Pre-marked with applicable Hazard/Handling Labels
  - Inner Containers - Hydrostatic Pressure Tested
  - Closure Tape
- ◆ Shipment Documentation
  - Shipper's Declaration / Bill of Lading - to be signed by the Shipper
  - Commercial Invoice
- ◆ Carrier Coordination
- ◆ Hazmat Employee Training Module / Certification
- ◆ Package Closure Instructions

### PRODUCT STORAGE / SAMPLE FULFILLMENT

Our Sample Fulfillment division receives shipment requests via email, then pours to your volume specifications, packages the samples within compliance, and next utilizes the best shipping option for you. Requests are shipped within 24 hours!

Chemtran USA eliminates costly overhead with safe and secure storage of your products. Storage options include:

- Standard Warehouse
- Room-Temperature
- Refrigerated “Cold” Storage

#### Transparency

Tracking information is sent to the requestor for each shipment after completion and is monitored by our staff until

delivery. Cumulative shipping and inventory reports are sent via email on a monthly basis. Criteria for all reports are tailored to each customer's needs.

## UN APPROVED TERMS

**Combination Packages** utilize an outer container and one or more inner containers.

**Single Packages** do not have inner containers. Material is placed or poured directly into them like drums or pails.

**Accessories** include everything else you need to complete your shipment - Bottles, Hazard Labels, Absorbent, etc.

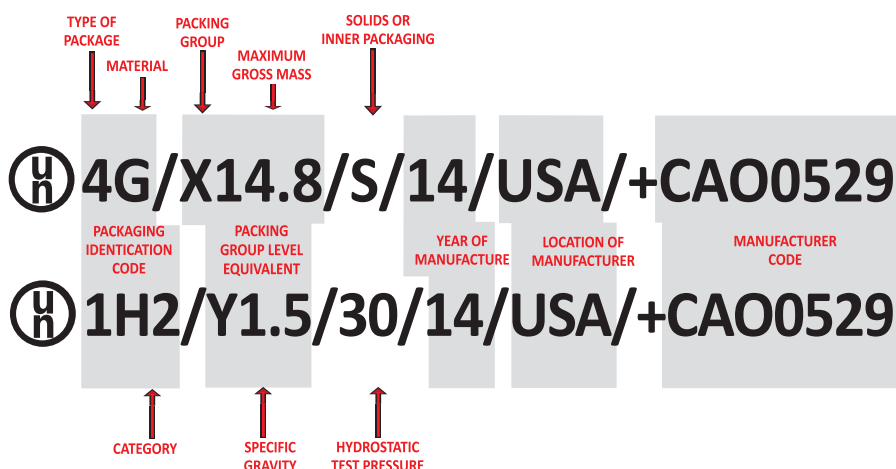

### QUESTIONS:

Chemtran USA's Hazmat Certified sales staff is available for recommendations based on what you are shipping, the mode of transportation and final destination.

## UN SPECIFICATION MARKINGS

### COMBINATION PACKAGING OR SINGLE PACKAGING FOR SOLID HAZARDOUS MATERIALS

Example of UN Marking for Solid Hazardous Materials in single or composite packaging or combination packaging for all materials.

### LIQUID HAZARDOUS MATERIALS

Example of UN Marking for Liquid Hazardous Materials in single or composite packaging.
